

***FLYING OBJECTS AUSTRALIA***

***08 Dealer Guide***

**Base**

**SIZES:**                      S                      M                      L                      XL

### DESCRIPTION:

The Base harness is designed to be a price point product that delivers versatility and functionality. This harness can be marketed for both Windsurfing and Kitesurfing with the aid of a detachable grab handle.

### FEATURES:

- Single Neo Wrap - Simplistic wrap and go closure system
- Thermoform Lumber Support - Extra padding for lower back support
- Mid Back Profile - Gives an extra degree of mobility
- High Hook Height - Allows for super easy release when required
- Removable Grab Handle - Versatility to cross sell
- S/S Leash Rings - Clip in for added safety
- Key pocket - Secure your key on the elastic cord and tuck away into key pocket

***Cross Fire***

**SIZES:**                      S                      M                      L                      XL

## **DESCRIPTION:**

The Cross Fire blends affordable pricing with proven design. This delivers a harness with thermoform padding, a medium flex character and is finished in a soft neoprene wrap. All these attributes lend to a functional design that provides maximum support in the lower back and minimises point loading

## **FEATURES:**

Internal Neo Belt - Pull around the waist for a secure tight fit

Thermoform Lumber Support - Extra padding for lower back support

Full Neo Soft Edge - 2mm Neoprene edge for comfort and protection

Mid Back Profile - Give an extra degree of mobility

High Hook Height - Allows for a super easy release when required

Key Pocket - Secure your key on the elastic cord and tuck away into key pocket

# Contour

SIZES:                      S                      M                      L                      XL

## DESCRIPTION:

The Contour offers all the comforts, style and design required to meet the more choosy of buyers. Extra attention has been paid to rider comfort, a full neoprene inner skin and outer edge offer a slick feel against the body and finished with a thermoformed outer for appearance, structure and support. Extra s/s rings have been added for bar pad options or simply to anchor a safety leash, giving the Contour a broader market appeal.

- FEATURES:**
- Neo Wrap - Provides a comfortable fit and feel across stomach
  - Full Neo Inner Skin - 3mm Neoprene lining for comfort and protection
  - 3-D Thermoformed Outer Skin - Provides support and structure with a modern look
  - High Back Profile - Maximum back support for hooked in riding
  - High Hook Height - Allows for a super easy release when required
  - Quick Release Hook - Removes the need to undo webbing loops
  - Optional Bar Pad - Locks in the spreader bar for a secure fit
  - S/S Leash Rings - Clip in for added safety
  - Key pocket - Secure your key on the elastic cord and tuck away in the key pocket

# Transit

SIZES:                      S                      M                      L                      XL

## DESCRIPTION:

The Transit was developed through a need for practicality and functionality, in dual function harness that combines a waist with a seat. This concept provides the high back support and hook height in a waist harness with the secure fit and feel of a seat. Also optioned with all the features that are delivered in the contour.

## FEATURES:

Seat Attachment - Stops the harness from riding up and provides extra support  
Neo Wrap - Provides a comfortable fit and feel across the stomach  
Full Neo Inner Skin - 3mm Neoprene lining for comfort and protection  
3-D Thermoformed Outer Skin - Provides support and structure with a modern look  
High Back Profile - Maximum back support for hooked in riding  
Mid Hook Height - Allows for the pull to come from the centre of the body  
Quick Release Hook - Removes the need to undo webbing loops  
Optional Bar Pad - Locks in the spreader bar for a secure fit  
S/S Leash Rings - Clip in for added safety  
Key pocket - Secure your key on the elastic cord and tuck away in the key pocket

## ***Hot Seat***

**SIZES:**                      S                      M                      L                      XL

### **DESCRIPTION:**

Using 3-D moulding and layering the Hot Seat has been designed to provide maximum support through the hip and seat area, this transfers the necessary power and control through to the rig. Differing from a waist harness the Hot Seat also has a lower back profile and lower hook height.

### **FEATURES:**

- Release Buckles - 20mm side release buckles secure the front sections together
- 3-D Moulded Outer skin - Provides structure and support for a firm fit
- Low Back Profile - Transfers the support through hips and seat
- Low Hook Height - Lower centre of gravity un-weights the board
- Quick Release Hook - Removes the need to undo webbing loops
- Neo Leg Straps - 2mm neoprene offers extra comfort and support
- Key pocket - Secure your key to the elastic cord and tuck away in the key pocket

# Sapphire

SIZES: XS S M L

## DESCRIPTION:

Designed with the Female form in mind the Sapphire offers maximum comfort with lower back support. Using a narrow profile and soft edging we have minimised the risk of bruising around the rib and hip area. Also offering versatility the Sapphire can be marketed to young children and smaller body types alike.

## FEATURES:

Neo Wrap - Provides a comfortable fit and feel across the stomach

Low Back Profile - Fits snugly into the lower back

High Hook Height - Allows for super easy release when required

Removable Grab Handle - Versatility to cross sell

S/S Leash Rings - Clip in for added safety

Key pocket - Secure your key to the elastic cord and tuck away in the key pocket

**FLYING OBJECTS AUSTRALIA**

## ***Flight Control Waist***

**SIZES:**

**S**

**M**

**L**

**XL**

### **DESCRIPTION:**

Based on the Contour the Flight Control waist is specifically designed for the kiter in mind. Offering standard features such as bar pad, grab handle and leash rings this harness will appeal to the beginner and pro alike. With a progressive design providing freedom of movement and load distribution we have minimised any point loading.

### **FEATURES:**

Neo Wrap - Provides a comfortable fit and feel across the stomach  
Full Neo Inner Skin - 3mm Neoprene lining for comfort and protection  
3-D Thermoformed Outer Skin - Provides support and structure with a modern look  
High Back Profile - Maximum back support for hooked in riding  
High Hook Height - Allows for extra freedom of movement for powered moves  
Widestyle Hook - Reduces accidental release from the chicken loop  
Quick Release Hook - Removes the need to undo webbing loops  
Bar Pad - Locks in the spreader bar for a secure fit  
Grab Handle - Designed for safety when launching overpowered  
S/S Leash Rings - Clip in for added safety  
Key pocket - Secure your key to the elastic cord and tuck away in the key pocket

## ***Flight Control Combo***

**SIZES:**                      S                      M                      L                      XL

### **DESCRIPTION:**

With an added seat attachment the Flight Control Combo provides extra support in the seat area. This aids in keeping the harness locked into position when flying the kite high. Using this combination we can maintain the support and structure through the back of the harness but also promoting better edging relying on the seat area.

### **FEATURES:**

Seat Attachment - Stop the harness from riding up and provides extra support  
Neo Wrap - Provides a comfortable fit and feel across the stomach  
Full Neo Inner Skin - 3mm Neoprene lining for comfort and protection  
3-D Thermoformed Outer Skin - Provides support and structure with a modern look  
High Back Profile - Maximum back support for hooked in riding  
Mid Hook Height - Allows for the pull to come from the centre of the body  
Widestyle Hook - Reduces accidental release from the chicken loop  
Quick Release Hook - Removes the need to undo webbing loops  
Bar Pad - Locks in the spreader bar for a secure fit  
Grab Handle - Designed for safety when launching overpowered  
S/S Leash Rings - Clip in for added safety  
Key pocket - Secure you key on the elastic cord and tuck away in the key pocket

## ***Flight Control Seat***

**SIZES:**                      S                      M                      L                      XL

### **DESCRIPTION:**

Incorporating a moulded and layered pattern the Flight Control Seat provides maximum support through the hips and seat reducing any point loading from hard edges. With a lower back profile and hook height this allows the rider to transfer all the weight through the heels promoting better edging.

### **FEATURES:**

Neo Wrap - Provides a comfortable fit and feel across the stomach  
3-D Moulded Outer Skin - Provides structure and support for a firm fit  
Low Back Profile - Transfers the support through the hips and seat  
Low Hook Height - Lowers the centre of gravity and promotes better edging  
Widestyle Hook - Reduces accidental release from the chicken loop  
Quick Release Hook - Removes the need to undo webbing loops  
Bar Pad - Locks in the spreader bar for a secure fit  
Grab Handle - Designed for safety when launching overpowered  
S/S Leash Rings - Clip in for added safety  
Neo Leg Straps - 2mm neoprene offers extra comfort and support  
Key pocket - Secure your key on the elastic cord and tuck away in the key pouch

**Felix**

**SIZES:**                      S                      M                      L                      XL

### DESCRIPTION:

Incorporating the hardcore style and character of Felix Pivec this design features a low back profile lined in a full neoprene inner. Freedom of movement with minimal restriction are key elements. Also with a unique look, moulded handle and Neoprene buckle fairing's to reduce line snagging make this model the choice for power riders.

### FEATURES:

Neo Wrap - Provides a comfortable fit and feel across the stomach  
Full Neo Inner Skin - 3mm Neoprene lining for comfort and protection  
Low Back Profile - Minimal restriction for powered moves  
High Hook Height - Allows for extra freedom of movement for powered moves  
Widestyle Hook - Reduces accidental release from the chicken loop  
Quick Release Hook - Removes the need to undo webbing loops  
Integrated Bar Pad - Locks in the spreader bar for a secure fit  
Moulded Grab Handle - Designed for safety when launching overpowered  
S/S Leash Rings - Clip in for added safety  
Neo Buckle Fairing's - Reduces lines snagging around buckles  
Key Pocket - Secure your key to the elastic cord and tuck away in the key pocket

## ***Harness Accessories***

2

1.

Bar Sizes: 20cm x 1.5" & 25cm x 1.5"

### **DESCRIPTION:**

1. Quick Release Hook - Standard on all the harnesses except our price point version the Base. Allows for easy access in or out of the harness.
2. Bar Pad - Supplied as standard or as an option the bar pad helps to reduce the ride of the spreader bar into the rib area

### **FEATURES:**

Quick Release Hook - Embossed Flying Objects logo  
Bright red handle for easy location  
Solid metal hook that won't bend or pop out

Bar Pad - Soft foam padding used on the inside for protection  
Rigid plastic insert to maintain shape and form  
Velcro fastening tabs to keep the hook in place  
Locking clips to secure the pad firmly in position  
Strap Attachments anchor the pad to the harness

Standard Harness Hook - Supplied in 20cm or 25cm x 1.5" stainless

Widestyle Kite Hook - Designed specifically for Kitesurfing to reduce accidental release from the chicken loop using a wider hook section  
Standard 25cm length

## ***Harness Lines***

1.

2.

Sizes: 18" 20" 22" 24" 26" 28" 30" 32"

### **DESCRIPTION:**

1. Fixed Harness Lines - Classic style built strong to last
2. Removable Fixed Harness Lines - Put them on and take them off, all without having to remove the tail piece of the boom. Simply fold the velcro tab over the boom arm and slide through the stainless ring, then fasten the velcro in place. Its that easy.

### **FEATURES:**

Fixed Harness Lines - Built tough to withstand the harshest environments  
Low stretch polyester rope maintains size and shape  
Transparent urethane tube  
Clear PVC size labels

Removable Fixed Harness Lines - Built to the same specs as the standard lines  
Low stretch polyester rope maintains size and shape  
Transparent urethane tube  
Clear PVC size label  
Stainless steel rings for closure system

# Footstraps

1.

2.

## DESCRIPTION:

1. SoftLine Footstrap - Easily adjustable belt style strap with built in pre curve.
2. RedLine Footstrap - Velcro adjustable light weight strap, designed to minimise water absorption and maintains a pre curved shape.

## FEATURES:

SoftLine Footstrap - 3mm Neoprene outer lining for comfort and protection  
Thermoformed outer cover for texture and style  
Pre curved shaping through high density webbing and PE stiffener  
Belt style adjustment through a stainless steel ring  
Multiple screw holes for adjustment and fit

RedLine Footstrap - 3mm Plush neoprene for super soft comfort  
Light weight design  
Layered velcro adjustment  
Pre curved shaping through high density webbing and PE stiffener  
Multiple screw holes for adjustment and fit

## Travel Cover

Sizes:	235 x 60	250 x 55	255 x 70	265 x 70
	235 x 80	250 x 65	255 x 100	265 x 80

### DESCRIPTION:

One of the products that Flying Objects has founded its reputation on, our travel covers are made from quality 600D polyester and padded out to 10mm. Using high quality YKK zippers and sliders avoids any salt corrosion or jamming. 8 cover sizes to suit a wide range of modern style boards from many manufacturers.

### FEATURES:

- 600D polyester - Used top and bottom for long lasting durability
- 10mm Padding - High density thickness for maximum protection
- Internal PE Fabric - PE lining reduces moisture absorption
- YKK plastic zippers - #10 sliders that will not corrode in saltwater or jam up with sand
- Drag patches - Heavy duty diamond embossed PVC at the nose and tail
- Carry handles - 3 to 4 conveniently located handles depending on cover size
- Fin Slot - Allows the fin to remain in the board while stored
- Complete range - 8 models to cover a broad market appeal

## Board Bag

Sizes: 235 x 60 250 x 55 255 x 70 265 x 70 280 x 90  
235 x 80 250 x 65 255 x 100 265 x 80 280 x 110

### DESCRIPTION:

Based on the travel cover patterns we have developed the board bag as a price point alternative. Using the same 600D polyester for the top and a reflective silver PE for the bottom the board bag provides extra heat deflection. Also delivered with a carry strap for extra mobility and is padded to a total of 6mm for protection

### FEATURES:

- 600D polyester - Used on the top for long lasting durability
- 6mm Padding - lighter padding for every day use and protection
- Reflective PE fabric - Deflects light from the surface to minimise heat absorption
- Internal PE Fabric - PE lining reduces moisture absorption
- Drag patches - Heavy duty diamond embossed PVC on the nose and tail
- Carry handles - Up to 4 conveniently located handles depending on cover size
- Fin Slot - Allows the fin to remain in the board while stored
- Complete range - 10 models to cover a broad market appeal

## ***Triple Travel Cover***

**Size: 260cm fitting 3 boards**

### **DESCRIPTION:**

With overall weight whilst travelling in mind the triple was designed to allow for more gear to be packed rather than heavy bells and whistles. Built in the style of our travel covers the triple still remains very durable, with space for 3 boards up to 260cm long all sleeved between with internal foam pads.

### **FEATURES:**

- 600D polyester - covering all external surfaces for maximum durability and protection
- 6mm Padding - each wall structure is lined with a light weight foam core
- Drag patches - Heavy duty diamond embossed PVC at the nose and tail
- Carry handles - 3 conveniently located handles for ease of moving
- Torsion Straps - 8 torsion straps to secure a tight fit around the boards
- Foam Sleeves - 2 extra foam sleeves for added protection between boards
- Light weight - Reduced weight for frequent travellers and minimising excess baggage

## ***Boom Bag***

Sizes:

Wave 170cm

Race 230cm

### **DESCRIPTION:**

Able to take up to 6 booms + accessories these boom bags are built using our 600D polyester and also designed to be light weight for ease of travel. Available in 2 sizes to accommodate both wave and race sized booms.

### **FEATURES:**

600D polyester - covering all external surfaces for maximum durability and protection

6mm Padding - each wall structure is lined with a light weight foam core

Carry handles - 3 conveniently located handles for ease of moving

Torsion Straps - 6 torsion straps to secure a tight fit around the booms

Light Weight - Reduced weight for frequent travellers and minimising excess baggage

## ***Quiver Bag***

**Sizes:** 255cm long

### **DESCRIPTION:**

Made using our 600D polyester the quiver bag will cater for several masts and sails. Easy access to the main section through a full length zip and also smaller compartment for smaller items. Again built to be very light weight for ease of travel. Both ends protected using diamond embossed drag patches along with carry handles.

### **FEATURES:**

- 600D polyester - covering all surfaces for maximum durability and protection
- Drag patches - Heavy duty diamond embossed
- Carry handles - 3 conveniently located handles for ease of moving
- Light Weight - Reduced weight for frequent travellers and minimising excess baggage
- Accessories pockets - Extra storage for extensions, bases etc..
- Torsion straps - Secure a tight fit around the sails and masts

# TT Cover

Sizes: 120 130 140 150 160

## DESCRIPTION:

A single TT cover made using 600D polyester both top and bottom with sizes and widths designed for modern board styles. An overall thickness of 6mm will provide ample protection and lined with PE fabric to reduce moisture absorption.

## FEATURES:

- 600D polyester - used top and bottom for long lasting durability
- 6mm Padding - maximum protection in a light weight design
- Internal PE Fabric - PE lining reduces moisture absorption
- Carry handle - carry handle centred for a balanced weight distribution
- Complete range - 5 sizes to cover a broad range of models

**FLYING OBJECTS AUSTRALIA**

## ***Kite Roller Bag***

**Size: 145cm Long by 50cm Wide**

### **DESCRIPTION:**

Designed for the frequent travelling kiter the TT roller will take 1 board, 2 kites and has several pockets for the extra accessories needed. Built for maximum protection and using 6mm padding covered by 600D polyester this bag packs tight with 2 torsion straps for a secure load all on travel wheels for mobility.

### **FEATURES:**

- 600D polyester - used throughout for long lasting durability
- 6mm Padding - maximum protection in a light weight design
- Internal PE Fabric - PE lining reduces moisture absorption
- Internal tie down - Secure your board to the base structure for protection
- Internal pockets - keep smaller accessories secure and easy to find
- Roller wheels - for ease of transport of heavy loads
- Torsion straps - Secures a tight fit when fully loaded
- Carry handle - carry handle centred for a balanced weight distribution

## ***Kite Coffin Bag***

Size: 145cm Long by 50cm Wide

### **DESCRIPTION:**

Capable of storing 1 board and 2 kites this coffin bag is a must for the travelling kiter. Minimising the excess use of material we have aimed to reduce weight where possible. Built for maximum protection and using 6mm padding covered by 600D polyester this bag packs tight with 2 torsion straps for a secure load.

### **FEATURES:**

- 600D polyester - used throughout for long lasting durability
- 6mm Padding - maximum protection in a light weight design
- Internal PE Fabric - PE lining reduces moisture absorption
- Internal tie down - Secure your board to the base structure for protection
- Internal pockets - keep smaller accessories secure and easy to find
- Light Weight - If weight is critical for travel this bag is minimised where possible
- Torsion straps - Secures a tight fit when fully loaded
- Carry handle - carry handle centred for a balanced weight distribution

## ***Surf Roller Bag***

Size:

6'4

### **DESCRIPTION:**

Designed specifically for kite surfboards this bag is tapered towards the nose section and able to store 1 board secured by locking straps with 2 kites packed on top. Built for maximum protection using 6mm padding covered by 600D polyester, this bag packs tight with 2 torsion straps for a secure load, all on travel wheels for mobility.

### **FEATURES:**

- 600D polyester - used throughout for long lasting durability
- 6mm Padding - maximum protection in a light weight design
- Internal PE Fabric - PE lining reduces moisture absorption
- Internal tie down - Secure your board to the base structure for protection
- Internal pockets - keep smaller accessories secure and easy to find
- Roller wheels - for ease of transport of heavy loads
- Torsion straps - Secures a tight fit when fully loaded
- Carry handle - carry handle centred for a balanced weight distribution

## ***SUP Travel Cover***

Sizes:      11'2 x 30      11'8 x 30      12'2 x 32

### **DESCRIPTION:**

A new range for Flying Objects, we see a strong market for this growing sport. Our covers are made from quality 600D polyester and padded out to 6mm for added protection. 3 carry handles balanced for equal weight distribution and ease of mobility

### **FEATURES:**

- 600D polyester - Used top and bottom for long lasting durability
- 6mm Padding - High density thickness for maximum protection
- Internal PE Fabric - PE lining reduces moisture absorption
- Carry handles - 3 to 4 conveniently located handles depending on cover size
- Fin Slot - Allows the fin to remain in the board while stored
- Standard range - 3 models to cover a broad market appeal

## ***Surf Board Bag***

Sizes:

5'10

6'2

6'8

### **DESCRIPTION:**

A dual marketed range these surf bags can be used for either kitesurfing or to enter the surf market. Using 600D polyester both top and bottom for durability and extra wear patches at the nose and tail. With a PE lining to minimise water absorption and 6mm padding for padding and protection.

### **FEATURES:**

600D polyester - Used top and bottom for long lasting durability

6mm Padding - High density thickness for maximum protection

Internal PE Fabric - PE lining reduces moisture absorption

Re-inforcing patches - Nose and tail re-inforcing for added protection

Carry handle - Conveniently located handle for a balanced feel

Standard range - 3 models to cover a broad market appeal
