PLASTIC PARTS
made by DuPont™

ENVIRONMENTAL INKS

AVAILABLE ON SOME MODELS:

ALUMINIUM 7075 F56 T6
(AERONAUTIC ALLOY)

FIBREGLASS & COMPOSITE-C

AUTOMATIC STOP

SOFT TOUCH GRIP

CLIP-BASKET

With this system it is easier to carry the poles and clip them together during rest stops to avoid losing them. Made in Zytel® (DuPont™).

SCREW SYSTEM

RBS

This system, enable you to put on or take off the basket very easily and quickly. You can use the correct basket for different conditions: the small basket (55 mm) can be mounted for trekking, during spring and summer time and the medium (95 mm) and the large (120 mm) basket is used with snow. The operation will take you only few seconds. You won't need any special tools, only your hand. The special materials by DuPont™ guarantee durability and efficiency in all atmospheric conditions, with every type of ground surface and at all temperature. The system is available in two version: short or long tip.

CARBIDE TIP (ALPINE)

SBS

This double expander, produced with materials tested at -50°C, ensures durability and safety. Made by DuPont™.

BS

One-piece expander is securely fastened to the pole so it can't get lost when sections get pulled apart. Made by DuPont™.

TSD

Thermo Sublimation Design anti-scratch and UV-Beans resistant.

LIGHT

The best balance between comfort and technology.

TELESCOPIC 3 SECTIONS

TELESCOPIC 2 SECTIONS

CARBIDE TIP (XC)

SAFETY STRAP

Made with the highest quality standards: soft internal covering in sweat absorbing material, easier strap closing system and simple adjustment according to the hand size.

SPECIAL FOR RACING

SPECIAL BACK-COUNTRY

SPECIAL FOR FREE-STYLE AND FREE-RIDE

SPECIAL FOR LADY

SPECIAL FOR JUNIOR

SKI POLES & TREKKING POLES

ENVIRONMENTAL INKS

New range of inks that is within the values laid down by Reference Norm. ASTM E 1645-01 and it complies with the requirements of the "Consumer Product Safety Act" (CPSA) Regulation Title 16, Code of Federal Regulations Part 1303 (total amount of lead lower than 600 ppm, i.e. 600 mg/Kg).

SCREW SYSTEM

New concept of support: made with highest quality materials, it permits to fix and remove baskets faster.

CLIP-BASKET SYSTEM

The poles stay clipped together by the baskets.

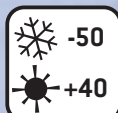

REPLACEMENT BASKET SYSTEM (patent)

AUTOMATIC STOP SYSTEM (patent)

The strap, utilising a unique automatic stop mechanism, ensures maximum security and performance. The automatic strap is simple to adjust and easy to lock in the correct and most comfortable position. Furthermore, in case of falls, the strap automatically unlocks freeing the hand and avoiding possible injuries to the wrist.

PLASTIC PARTS

All plastic materials are resistant to thermal shock, weather changes and frost thanks to the excellent overall performance of these engineering polymers at sub-freezing temperatures as low as -50°C . Made by DuPont™.

ALUMINIUM 7075 F56 T6 (Aeronautic Alloy)

Alu 7075 has a mechanic resistance at 56 kg/mm^2 F56. Shafts are strong and light, perfectly designed for a ski use.

FIBREGLASS & COMPOSITE-C

Lighter and extra strong shafts: a perfect compromise between lightness and resistance.

MADE IN ITALY

ABS

POLYCARBONATE 100%

Thermoplastic resin-polycarbonate (100% PC), the best material with the higher tensile strength ultimate and tensile strength yield.

PAINTING

Painting gives a long term stable and anti-scratch UV-beams resistance, eliminating the deterioration of the materials under the solar beams.

GOOGLE RETENTION

SOFT PADDING

All our helmets are equipped with a comfortable padding that offers an excellent fitting. Some models are also equipped with a removable and washable fabrics for a perfect hygiene and comfort.

HOMOLOGATION CE EN 1077

All our helmets are homologated CE EN 1077 and certificated by FISI. The CE EN 1077 certification requires the protection of the vital points of the head. Our helmets have been submitted to destroying tests and have obtained the maximum shock absorbing values and highest penetration resistance.

PASSIVE VENTILATION

All our helmets have ventilation channels, that guarantee a perfect fresh air circulation eliminating vapour and excessive heat.

JUNIOR SERIES

BUD

HELMET'S PACKAGING

**100% UV
PROTECTION**

CYLINDRICAL LENS

TPU

**AIR VENTILATION
SYSTEM**

AS SYSTEM

Anti-Scratch lens.

AF SYSTEM

This system works as an Anti-Fog thermal barrier between the external cool air which can't come in contact with the warm air inside the goggle.

AVAILABLE ON SOME MODELS:

SOFT-FOAM

Double or triple soft-foam, cut in a single piece applied to the frame. The foam is doubled-up by thermoformed to a layer of velvet. This solution has been developed for the comfort of the skiers

**4 COLOURS
PROCESS**

DOUBLE LENS

A combination of an acetate (inner) lens coupled to a second polycarbonate (external) lens with an air pocket (thickness 2,5mm) in between.

**STRAP WITH
SILICON LINES**

**POLARIZED
LENS FILTERS**

SPECIAL FOR JUNIOR

MADE IN ITALY

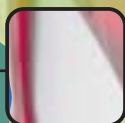

100% UV PROTECTION

100% UV-A/B/C protection, safeguarding the eyes against harmful ultraviolet radiations.

TPU

Thermo polyurethane frame (TPU), differently from PVC, remains softer at any temperature.

CYLINDRICAL LENS

Cylindrical lens with a 0,75 mm constant thickness for a maximum visual protection.

POLARIZED LENS FILTERS

The polarized lens filters randomly reflected light, reducing reflections. Vision becomes crystal clear and objects are much quicker to identify. This system allows the skier to easily see changing textures on snow and ice.
